GROUNDWATER REDUCTION PLAN UPDATE

On June 11, 2003, the Harris-Galveston Subsidence District ("HGSD") Board of Directors approved the North Harris County Regional Water Authority (the "Authority") Groundwater Reduction Plan ("GRP"). Submittal of the GRP for review and approval by the HGSD was a requirement of the HGSD 1999 Regulatory Plan. This GRP document served as a very effective "game-plan" for development and implementation of the Authority's 2010 Surface Water Transmission and Distribution System.

After the data from the 2010 U.S. Census became available, the HGSD began a process to update the 1999 Regulatory Plan which then resulted in development of the 2013 Regulatory Plan that was adopted by the HGSD Board of Directors on January 9, 2013 and amended on May 8, 2013. One of the requirements of this updated Regulatory Plan is that permittees having an approved GRP must incorporate any changes required by the updated plan and submit a revised GRP to HGSD no later than July 1, 2014.

AECOM Technical Services, Inc. ("AECOM") was engaged by the Authority to develop the required Groundwater Reduction Plan Update. The draft of this document was presented at the June 2, 2014 Authority Board of Directors meeting to the Board members and audience with that presentation focusing on the major components of the document that were to be submitted to the HGSD. Subsequent to the presentation, the Authority Board voted unanimously to approve the GRP Update and to authorize the General Manager to submit the GRP Update to the HGSD on or before July 1, 2014.

A major requirement of that plan is that the Authority achieves a 60% use of surface water by 2025 as compared to the current 30% requirement. In order to reach that 60% mandate, the Authority will have to deliver surface water to a significant number of

additional utility districts which will require construction of a greatly expanded water transmission and distribution system.

In addition, the Authority will be required to participate in the cost of the City's expansion of the Northeast Water Purification Plant as well as construction of a second transmission line from the Plant and will also have to pay the Authority's prorata share of the cost of constructing the Luce Bayou Interbasin Transfer Project. For at least a couple of years, I have included a monthly status report in my General Manager's Report for each of these projects. The original focus of these reports was on the status of negotiations with the City of Houston on the contracts / legal agreements required for each of these projects. Now that each of these projects had reached the engineering design and/or construction phase, I have requested of Steve Berckenhoff that he now include the status reports in his Program Manager's Report.

E.2.b. Update on status of Surface Water Conversion Program.

Steve Berckhenhoff will provide a report regarding the status of the Permit Year 2010-2025 Surface Water Conversion Program.

E.2.c. Update on 2010-2025 Water Distribution and Transmission System.

AECOM Technical Services, Inc. ("AECOM") as the Program Manager for the Authority, has broad responsibility for monitoring and coordinating the activities of the various consultants (civil engineers, surveyors, groundwater hydrology engineers, geotechnical engineers, real estate acquisition firms, etc.) who are providing professional services for the 2010-2025 water distribution and transmission system. Of primary concern to me as General Manager, is that we approach this program with a constant eye toward schedule and budget.

Economic and Market Commentary: The Fed fine-tunes its response

May 1, 2020

The Federal Reserve has made many crucial and successful moves in the wake of the Covid-19 crisis. But what it has done since also has been impressive. Policymakers have not ceased in their effort to bring the instrument that is the economy back in tune. It has been reassessing the effectiveness of its new rates, facilities, purchases and programs, and adjusted them or added more. The easiest way to see this is how large its balance sheet has become, rising to around \$6.7 trillion at month-end.

We may see alterations to Fed facilities in the coming weeks. All of the major money market programs have declined in usage. It would not surprise us to see the Fed reduce the amount of lending offered for the Money Market Mutual Fund Liquidity Facility (MMLF), Primary Dealer Credit Facility (PDCF) and Commercial Paper Funding Facility (CPFF). Certainly, the CP market is normalizing, with the London interbank offered rate (Libor) falling and spreads narrowing. The Fed also will decrease the amount and frequency of overnight and term repo that it initiated to facilitate market functioning due to coronavirus-caused dislocations.

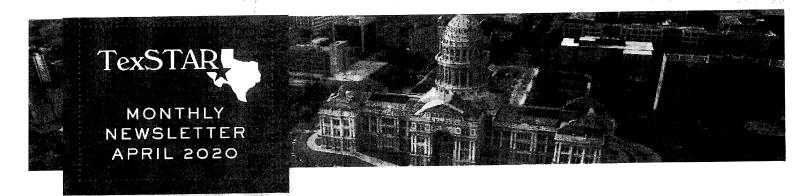

A recent fine-tuning by the Fed came in the municipal space. On April 27, it announced a massive expansion to its new Municipal Lending Facility for state and local

ECONOMIC COMMENTARY

Market review

After the severe shock in March, markets rebounded strongly in April. The U.S. government's and Federal Reserve's (Fed) substantial policy response measures to support markets and the economy to reduce the damage caused by the economic shutdown, restored some positive sentiment to markets. Fixed Income markets rallied as the Fed committed to purchase more government, money market instruments and corporate bonds. Managing the epidemic in the U.S. has inevitably become a political battleground given the upcoming presidential election later this year. The U.S. economy contracted at an annualized pace of 4.8% in the first quarter of the year. Fiscal stimulus measures launched by Congress have been enormous, but more may still be required. Economic data continued to suggest global demand and labor markets are deteriorating at unprecedented speeds. Over 30 million people have filed for unemployment insurance since mid-March and how many of those laid off will end up being only temporary will be key for the outlook. Retail sales also fell 8.4% in March. The Fed's response has been dramatic in both size and speed. The establishment of the Money Market Mutual Fund Liquidity Facility and the Commercial Paper Funding Facility, among the many programs designed to heip support markets and the economy, proved to be a game changer for the U.S. money markets, helping to restore market liquidity and the flow of credit. Funding stress in the money markets markedly improved due to Fed intervention and the surge in Treasury bill supply to fund the U.S. Government's various stimulus programs. The U.S. 3-month Treasury bill yield rose 2 bps to end the month at 0.08%, while the 12-month Treasury bill yield declined 4 bps to end at 0.14%. (continued page 4)
