

COMMUNITY ENGAGEMENT MEETING FOR PROJECT 37

The North Harris County Regional Water Authority (The Authority) will host a Community Engagement Meeting for Project 37. The purpose of this meeting is to inform residents about the status of Project 37 and share project information.

The Authority is under a mandate to convert the portion of Harris County, within our boundaries, from groundwater to primarily surface water. As part of the conversion plan (referred to as a Groundwater Reduction Plan – GRP) submitted to the Harris Galveston Subsidence District (HGSD), Project 37 is a key component of the Authority’s GRP to achieve the mandated conversion.

After conducting a preliminary engineering study, the proposed alignment for Project 37 was determined to be most feasible as shown on the attached map. This alignment considered several factors such as minimizing the impact on structures, total number of easements required, most cost-effective route to deliver surface water to the different public water providers, and the ability to maintain the proposed water line in the future. Community engagement is an important component of Project 37, and we invite your participation as the project is implemented.

The Community Engagement Meeting will be held on:

MONDAY, MARCH 25, 2024

6:00 to 7:30 p.m.

**Grand Lakes Junior High School - Cafeteria
20247 Cypress Rose Hill Rd, Tomball, TX 77377**

The meeting will begin with a brief presentation to share project information and updates, followed by a moderated Q&A session with the Authority’s team members. Residents will be able to submit questions and comments during and after the meeting.

We hope you can attend the Community Engagement Meeting. Information will be available after the meeting on the Authority’s website at <https://www.nhcrwa.com/>
